

**How to find the area:** From Targu-Jiu drive ~11 km towards Baia de Arama. Just before entering Runcu village turn right for Sohodol Valley and keep the main road until the end of Rachiti village ~4 km where Sohodol Gorge can be seen.

Din Tg.Jiu cca.11 km catre Baia de Arama. Chiar inainte de a intra in satul Runcu cotiti dreapta pentru valesa Sohodol si continuati pe drumul principal pana se termina satul Rachiti cca.4 km de unde Chele Sohodol sunt vizibile.

**How to find the crags:** Climbing crags are located in the second half of the gorge at ~1,5 km from Rachiti village. All crags are next to the road.

Falezele amenajate se afla in partea a doua a cheilor la cca. 1,5 km de la iesirea din satul Rachiti. Toate falezele se afla in apropierea drumului.

In Sohodol gorge it is best to climb from the middle of April to the end of September. Generally it is a shady area with a dry weather.

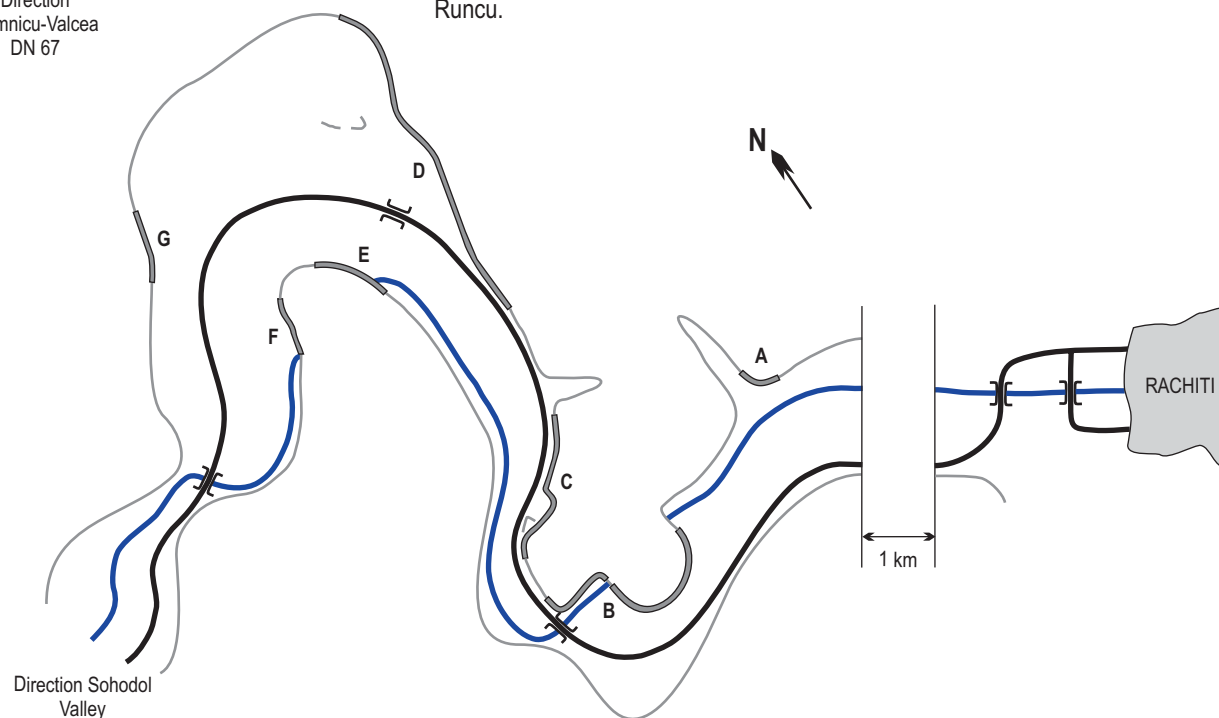

Perioada optima pentru caarare in Sohodol este din mijlocul lunii August pana pe sfarsitul lui septembrie. In general este o zona umbrasa cu putine ploii.

**Accommodation:** It is possible to camp just next to the crags or you could ask for accommodation at Sohodol Chalet ~4 km farther from the gorge. Another possibility is to be accommodated in Tg.Jiu.

Se poate campa cu cortul sub unele faleze sau se poate dormi la cabana Sohodol al cca. 4 km de chei. Alte posibilitati ar fi in orasul Tg. Jiu.

**Water:** Usually the water of the Sohodol river is drinkable. In the gorge there is no other source of water. You can buy mineral water from Rachiti and Runcu villages or you can get it from some taps installed next to the road in Rachiti village. For health safety reasons it is recommended that you bring your water from Rachiti or Runcu villages.

In chei nu exista alta sursa de apa decat raul. Surse sigure de apa potabila sunt magazinele satesti sau robinetele de pe marginea drumului din satele Rachiti si Runcu.
